OTHER SKILLS

English – good understanding in writing and speech.

IT SKILLS

BACK-END: PHP • CODEIGNITER / SYMFONY • MYSQL

That are my fundamentals skills. I've started with these technologies about 4 years ago. Later I've chosen CodeIgniter as "small" framework to discover a fundamentals of MVP's developing pattern. As summary of this "web chapter" I've decided to build my own CMS using these technologies. Now I focus on Symfony Framework and front-end skills.

FRONT-END: HTML • CSS+SASS • BOOTSTRAP 3/4 • PHOTOSHOP

Honestly, I much more prefer to work in back-end but bigger part of my realizations were focused on front-end so I've some skills. I use features from HTML and CSS as possible. I know very well bootstrap in version 3 and I am familiar with newest version as well. In Photoshop I'm able to make basic photo's modifications and cuts.

JAVASCRIPT (BASIC) • JQUERY

I can't say I am good in JS but I know good jQuery framework which makes possible to code in this technology without big knowledge. I have completed several projects using Ajax' queries.

GIT

I am familiar with this tool, but I've never worked in a team.

EDUCATION

ADMINISTRATION STUDIES • 2012 • BESKIDZKA SZKOŁA UMIEJĘTNOŚCI IN ŻYWIEC

Finished with a good grade and a bachelor's degree.

SECONDARY SCHOOL • 2008 • SZ. IM KEN IN TYMBARK

Finished with good degree and with passed Matura exams.

EXPERIANCE

FREELANCER WEB DEVELOPER & REITAN DISTRIBUTION (DENMARK) WORKER

*Since 2016 - 01 until **NOW***

I work (not IT) as warehouse assistant in Denmark and except that I develop my programming skills and do some projects. Now I focus on my portfolio website.

FREELANCER WEB DEVELOPER / SELF EMPLOYED

2013 - 04 to 2014 - 09

I also worked for my own business. I've received a EU dotation and fully used it. Half of my business services were marketing for ex-employer like projecting graphics for internet companies, managing a website and service of external websites content.

MARKETING SPECIALIST - PPUH TIP-TOP ANDRZEJ BIERNAT

2012 - 02 to 2013 - 01

In this job I was responsible for some administrations jobs and also for "marketing image" of local network of shops. In this job I first time met with web development and I started to learn this profession.

NOTE:

In the experience list I ignored less important jobs (I can say something about it on an interview if we have any). As my experience in IT is not very rich I included a projects I've made during my "IT career".

SELECTED PROJECT'S (RANDOM ORDER)

Altego CMS *(from 2014-04 and still)*

It is my biggest project. I treat it as good way to learn and do something real in the same time. I work on it over 2 years and I still upgrade it (my skills and the technology changes). Some projects on my CMS are marked as below.

Technologies & Tools: PHP7, CodeIgniter3, MYSQL, jQuery, HTML, CSS, Bootstrap 4

Sources:

<https://github.com/seigba/altego.cms> - GIT sources of this project

<https://stwarog.com/en/realizations-it/35/altego> - description of this project

Fotofilmowanie-kusnierz.pl *(2017-09)*

Project for photographer. Customized Website with extra features like "customer area" – with required password to access hidden data.

Technologies & Tools: PHP7, CodeIgniter3, MYSQL, jQuery, HTML, CSS, Bootstrap 4

<https://www.fotofilmowanie-kusnierz.pl/>

<https://stwarog.com/en/realizations-it/111/photo-and-video-janusz-kusnierz>

Fizjo-nova.pl *(2017-08)*

Project based on Altego CMS with landing page and a lots of information's about company.

Technologies & Tools: PHP7, CodeIgniter3, MYSQL, jQuery, HTML, CSS, Bootstrap 4

<https://fizjo-nova.pl/>

<https://stwarog.com/en/realizations-it/91/fizjo-novapl-rehabilitation-clinic>

Call center database system *(2013-05)*

A system dedicated for company doing a lots of phone calls to potentials customers. Application allows workers to parse a Polish "CEIDG" site (website with the list of new opened businesses' with many limits) and extract a data to private database. After this workers had a possibility to contact customers from DB in selected order and area and mark a speech status to avoid recalling again to the some customers in selected conditions. A customer storied over 500k contacts from ceidg.gov.pl site.

Technologies & Tools: PHP5, CodeIgniter2, MYSQL, jQuery, HTML, CSS

Dastim.com *(2017-06)*

Project for truck company. Website with the Altego's CMS, individual theme with RWD (on Bootstrap 4). Customer also ordered a short movie as "intro background" and it will be made by me in May. Then this site will be published.

Technologies & Tools: PHP7, CodeIgniter3, MYSQL, jQuery, HTML, CSS, Bootstrap 4, Sony Vegas (video editor)

<https://www.dastim.com>

<https://stwarog.com/en/realizations-it/32/design-and-realization-dastim-com>

Internal "orders system" *(2013-12)*

In company where I worked as marketing specialist were couple locations of shops. I've made an internal system to ordering a products (each shop could order selected). The system were doing a summary of all orders and prepared it in clean and readable form for driver. It's makes a communication in this company much easier.

Technologies & Tools: PHP5, MYSQL, jQuery, HTML, CSS

Fotopola.pl *(2017-05)*

Project for photographer. Customized Website with extra features like "customer area" – with required password to access hidden data. Same custom gallery features included.

Technologies & Tools: PHP7, CodeIgniter3, MYSQL, jQuery, HTML, CSS, Bootstrap 4

LINKEDIN.COM

Alufelgi.limanowa.pl (2017-03)

Small project on Altego CMS with an extra plugin to managing DB of users products (customer sells wheels for cars).

Technologies & Tools: PHP7, CodeIgniter3, MYSQL, jQuery, HTML, CSS, Bootstrap 4

<http://alufelgi.limanowa.pl>

<https://stwarog.com/en/realizations-it/34/alufelgi-limanowa-project-and-design>

Dom-ino.net (2014-01)

Website for a constructor company. The project includes a gallery of realizations and “small” content management system. I also worked a lot of on good positioning this site in Google search results.

Technologies & Tools: PHP5, CodeIgniter2, MYSQL, jQuery, HTML, CSS, Bootstrap 3

<https://stwarog.com/en/realizations-it/36/dom-ino-construction-company>

Online shop (2015-05)

I have also some experience with building online shop systems. It was an extra module to previous version of my CMS. The shop was easy in managing and had basics function like listing, changing orders, markings product's etc. The final product also operate with external libraries and API to allow a customer to make an instant payment in selected banks.

Technologies & Tools: PHP5, CodeIgniter2, MYSQL, jQuery, HTML, CSS, Bootstrap 3

Most of my projects are available on Website:
